

MemberFlow User Guide

A simple guide for mosque staff and members. Screenshots are from the **Suriname demo** environment.

What is MemberFlow?

MemberFlow helps your mosque manage members, contributions, events, and a **business directory** — a list of trusted businesses run by people in your community.

Organizations can also form a **federation** (partnership). For example, a parent organization like SIS Suriname can partner with local mosques so shared businesses appear across the network.

Demo accounts (for training)

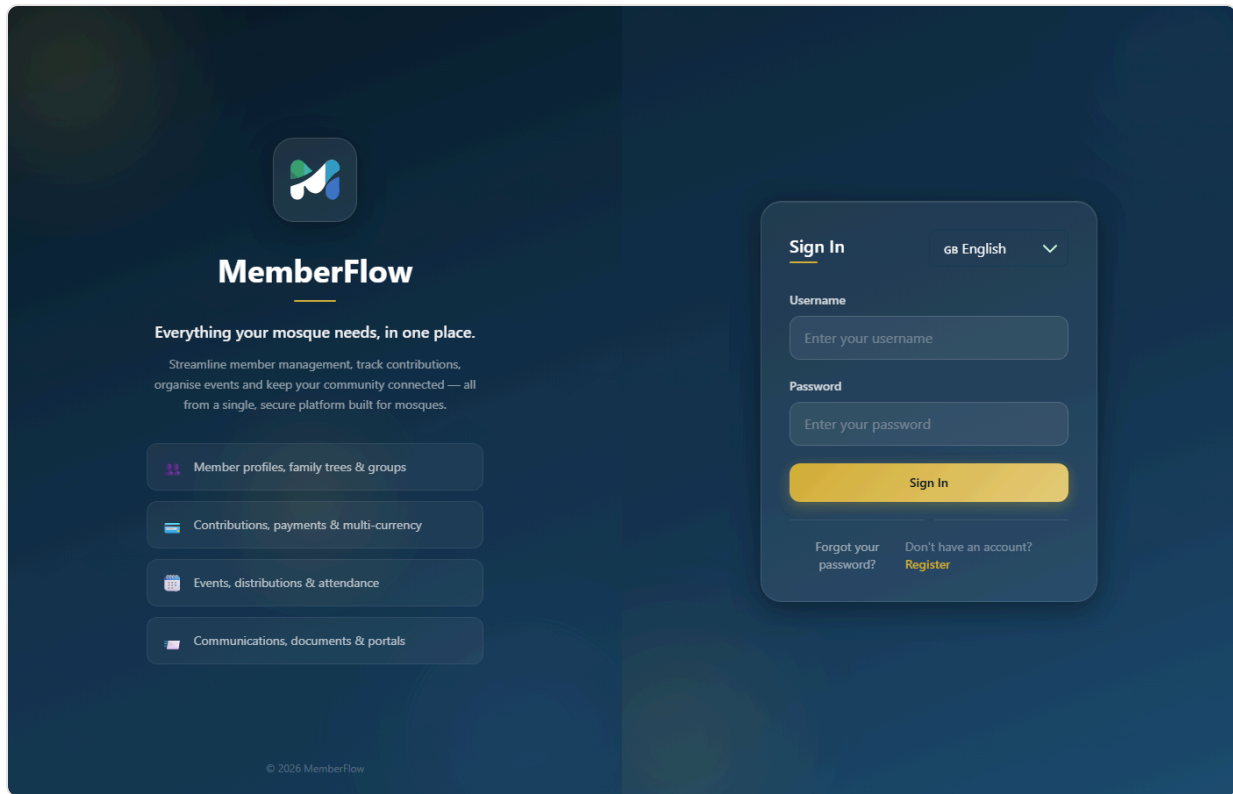

All demo users share the password: **DemoPass123!**

Who	Username	Organization	Best for
Federation admin	demo_sis_admin	SIS Suriname	Partnerships, federation overview
Mosque admin	demo_baitur_admin	Moskee Baitur Rochim	Approving businesses, directory admin
Member (portal)	demo_baitur_member	Moskee Baitur Rochim	Registering your own businesses

Other mosques (Darul Iman, An-Nur) have the same pattern: **demo_darul_admin**, **demo_annur_member**, and so on.

1. Sign in

1. Open the MemberFlow login page.
2. Choose your language (English or Nederlands) if needed.
3. Enter your **username** and **password**.
4. Click **Sign In**.

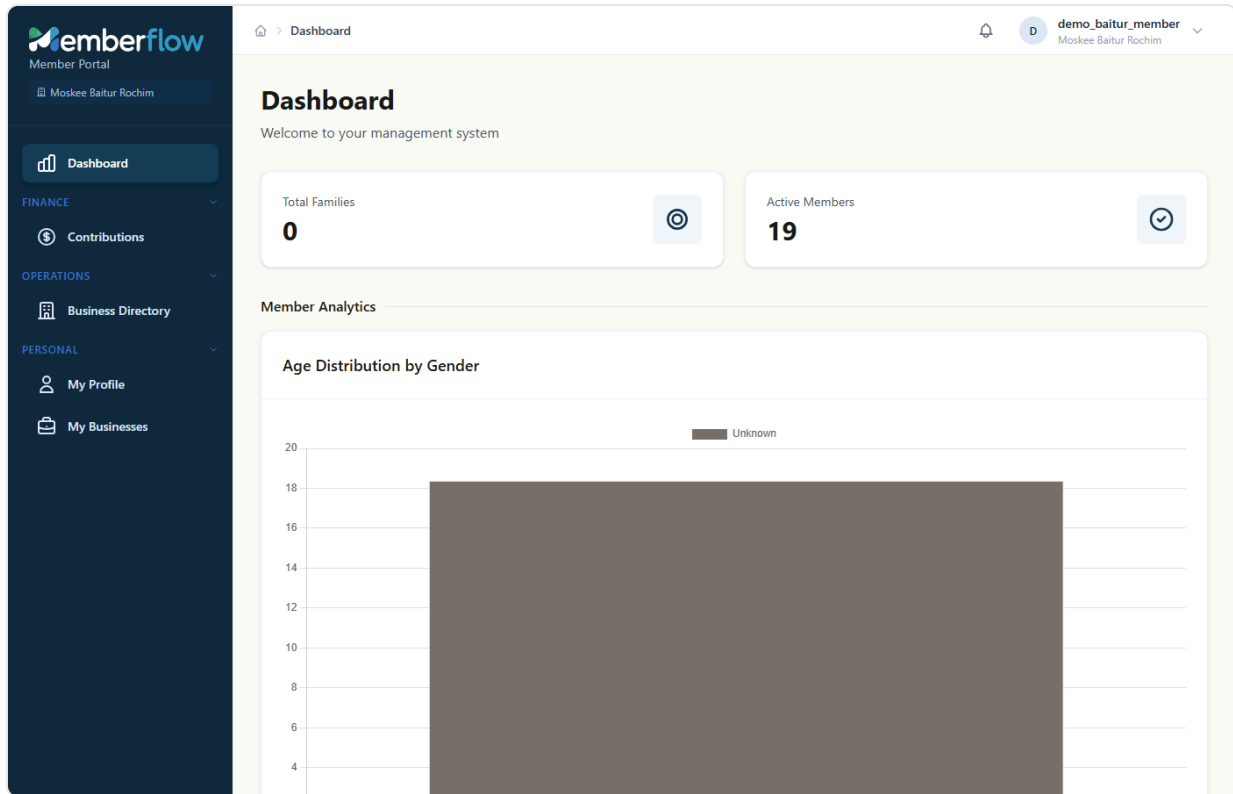

Sign in screen

After a successful login you land on the **Dashboard**.

2. Dashboard

The dashboard is your home screen. It shows a quick overview of your organization (for example active members and simple charts).

Member dashboard

Where to go next

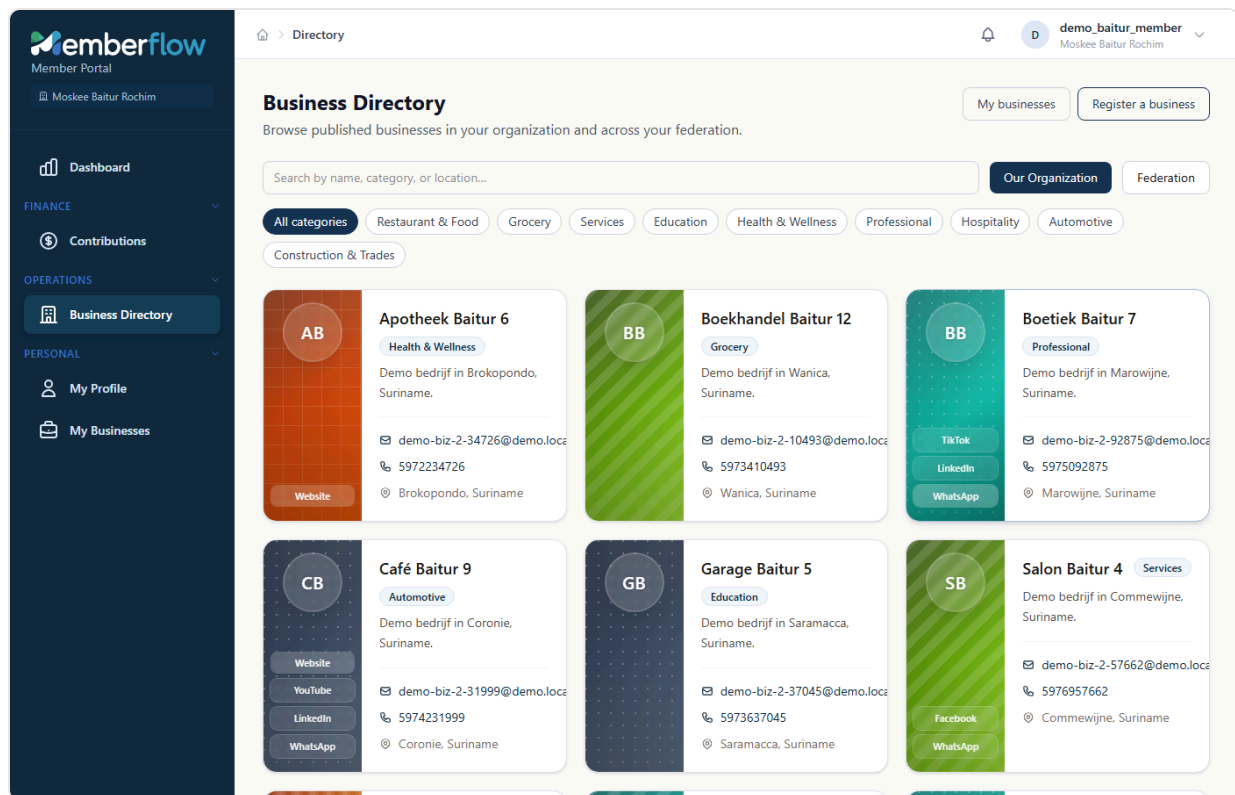

- Use the **left menu** to open Features.
- Your name and organization appear at the top right.
- Use the bell icon for notifications.

3. Browse the Business Directory

Open **Operations** → **Business Directory**.

Here you can:

- Search businesses by name, category, or location
- Filter by category (Restaurant, Grocery, Health, and so on)
- Switch between **Our Organization** and **Federation** (partner mosques)

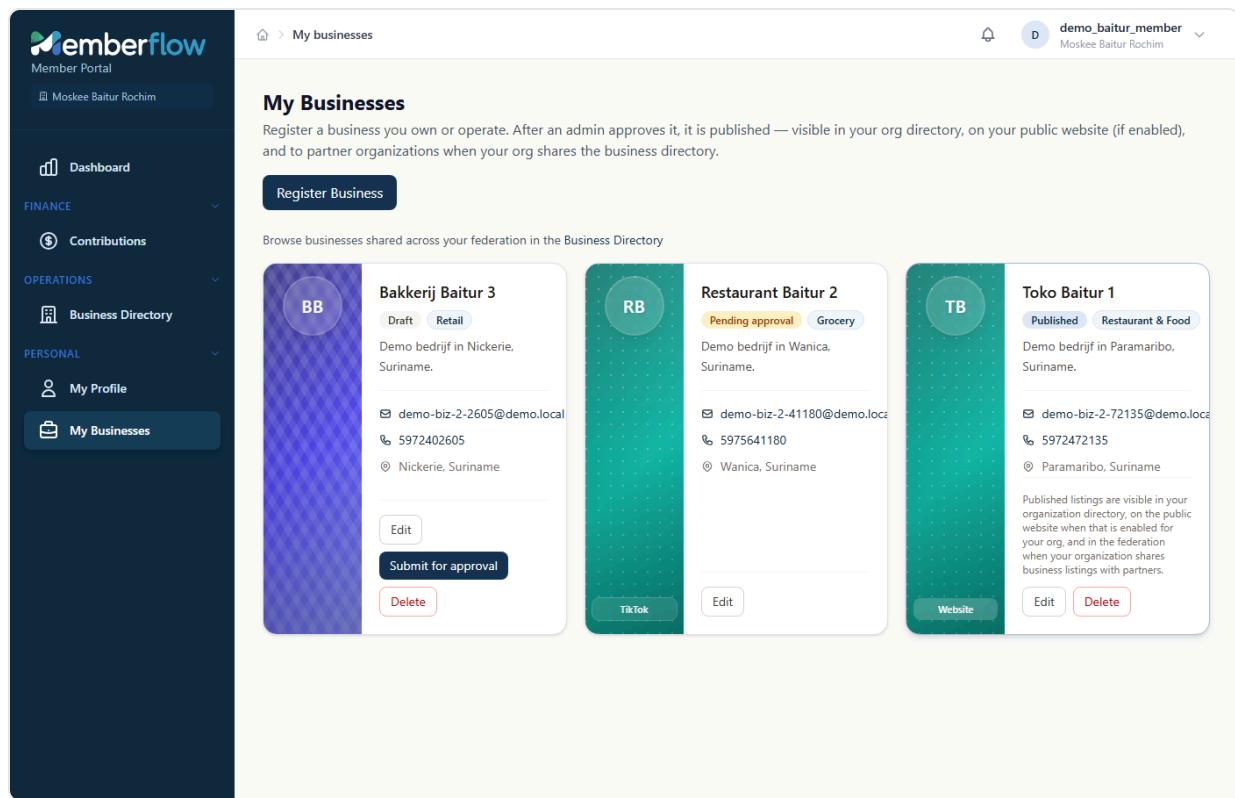

Business Directory

Each card shows the business name, category, short description, and contact details. Some cards also show website or social media links on the coloured side panel.

4. Register your own business (members)

Members who have a linked member profile can register businesses they own.

1. Open **Personal** → **My Businesses**.
2. Click **Register Business**.

My Businesses list

You will see the status of each business:

Status	Meaning
Draft	Saved, not yet sent for review
Pending approval	Waiting for an admin
Published	Visible in the directory
Suspended	Temporarily removed by an admin

Fill in the form

On **Register Business**, enter:

- Business name and category
- Optional description, email, phone
- Optional website and social links
- City and country

Then **Save as draft**. When you are ready, open the business again and choose **Submit for approval**.

Register a business form

Note for admins: Accounts that are *not* linked to a member profile cannot use My Businesses. Use **Directory Admin** instead to manage organization listings.

5. Approve businesses (admins)

Mosque admins open **Administration** → **Directory Admin** (or **Directory Administration**).

Here you can:

- See all local businesses
- Review **Pending approval**
- Publish, reject, or suspend listings
- Manage what is shared with federation partners

Directory Administration

Approve a pending listing

1. Open the **Pending approval** tab.
2. Review the business details.
3. Choose **Approve** (or reject with a reason if needed).

Pending approvals

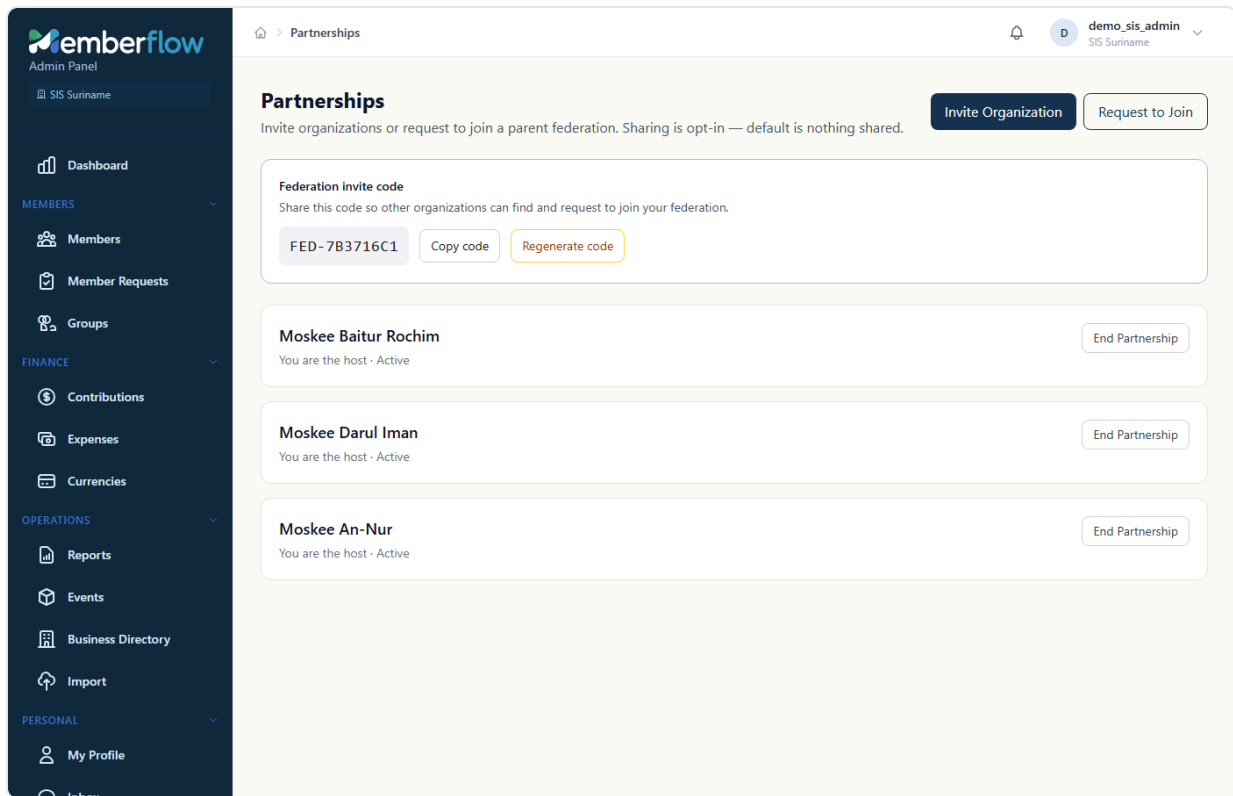

After approval, the business appears in the Business Directory for your members (and in the federation when sharing is enabled).

6. Partnerships (federation)

Parent organizations (like SIS Suriname) manage partnerships under **Administration** → **Partnerships**.

From this screen you can:

- See partner mosques and their status
- Invite another organization, or accept a request
- Share an **invite code** so others can find your federation
- Choose what to share (for example the business directory)

Partnerships

Typical roles

- **You are the host** — your organization is the parent (federation).
- **You are the partner** — your mosque joined a parent federation.

Sharing is optional. Nothing is shared until an admin turns sharing on.

7. Everyday tips

1. **Wrong organization?** Check the name under your profile at the top right. Demo users belong to one mosque each.
2. **Cannot register a business?** Your login must be linked to a member profile. Ask an admin, or use a member account such as `demo_baitur_member`.
3. **Business not visible?** It must be **Published**. Draft and pending items stay private until approved.
4. **Language** — switch English / Nederlands from the login page or account preferences where available.

Quick path: try the full business flow

1. Sign in as `demo_baitur_member` / `DemoPass123!`
2. Open **My Businesses** → register or submit a draft.
3. Sign out, then sign in as `demo_baitur_admin` / `DemoPass123!`

4. Open **Directory Admin** → **Pending approval** → Approve.
5. Open **Business Directory** to see it published.
6. Sign in as `demo_sis_admin` to review **Partnerships** and federation sharing.
